1. Introduction

1.1. Purpose and Scope

With the Covid-19 pandemic, the need for a faster, easier and more efficient vaccination process became exponentially more important. To achieve this, vaccination institutions have started to develop and use software with the objective of streamlining this process.

This application is intended to manage and overview the vaccination process performed by multiple vaccinations centers as well as many health care professionals, from the creation of centers and the vaccination process, to the viewing of statistics.

The application's scope covers data from:

- Sns Users
- Employees
- Vaccination Centers
- Vaccines
